PROFILE SUMMARY

Computer Science student with a strong interest in software testing and quality assurance. Familiar with SDLC, STLC, test case design, and bug lifecycle. Hands-on experience with SQL and APIs, along with basic knowledge of Selenium and Pytest for web testing. Skilled in identifying defects, validating functionality, and ensuring software reliability.

EDUCATION

Vellore Institute of Technology – Bachelor of Technology, CSE (Health Informatics)

Sep 2022 – 2026

CGPA: 8.16/10.0

TECHNICAL SKILLS

Testing & QA: Manual Testing, Test Case Design, Test Scenarios, SDLC, STLC, Regression Testing, Sanity Testing

Automation Tools: Selenium WebDriver, Pytest, Basic Test Automation Frameworks

Tools: Postman (API Testing), Jira (Bug Tracking), Git, GitHub

Programming: Python, SQL, C++

Concepts: APIs, Database Systems, Data Validation, Debugging, Basic OOP

EXPERIENCE

Generative AI Virtual Internship – Google Cloud (SmartBridge)

2025

- Worked on real-world use cases using Generative AI tools to design structured and consistent outputs.
- Refined prompts iteratively to improve accuracy, relevance, and reliability of generated results.
- Evaluated outputs for correctness and logical consistency, identifying gaps and improving response quality.
- Applied structured problem-solving and validation approaches similar to testing workflows.

PROJECTS

E-commerce Web Testing Automation

Python, Selenium, Pytest

- Automated 15+ test scenarios covering login, product search, add-to-cart, and checkout workflows.
- Designed and executed test cases improving functional coverage across key user flows.
- Identified and validated 10+ UI and workflow defects with proper test evidence.
- Generated HTML test reports reducing manual validation effort by approx. 30%.

Smart Documentation Assistant

Python, Database Integration

- Developed a system to generate structured documentation, improving content clarity for 5+ use cases.
- Designed workflows to organize and present information, reducing ambiguity in outputs.
- Validated content accuracy and consistency across multiple inputs and formats.
- Improved readability and usability, reducing user effort in understanding documentation.

Sales Insights & Business Strategy Support

SQL, Data Analysis

- Analyzed datasets of 1000+ records to extract actionable business insights.
- Identified key trends in customer behavior and revenue contributing to better decision-making.
- Performed data cleaning and validation to improve data accuracy and reliability.
- Generated structured reports highlighting 3–4 key business metrics and performance indicators.

CERTIFICATIONS

- Google Cloud – Generative AI Virtual Internship
- AWS Academy – Cloud Foundations
- Languages: English (Fluent), Hindi (Fluent)
