PROFILE SUMMARY

Final-year B.Tech Computer Science student with strong foundations in Machine Learning, Python, and SQL. Experienced in data preprocessing, exploratory data analysis (EDA), feature engineering, and model development using Scikit-learn and TensorFlow. Passionate about applying ML techniques to solve real-world business problems and building data-driven solutions.

EDUCATION

Vellore Institute of Technology – Bachelor of Technology, CSE (Health Informatics)

Sep 2022 – 2026

CGPA: 8.16/10.0

TECHNICAL SKILLS

Programming: Python, SQL, C++

AI & APIs: Gemini API, LangChain, Hugging Face (Exposure), Prompt Engineering

Automation Concepts: API Integration, JSON Handling, Workflow Automation

Data Handling: Pandas, NumPy, EDA, Data Cleaning

Machine Learning: Scikit-learn, TensorFlow, Model Evaluation

Cloud Platforms: Google Cloud Platform (Vertex AI)

Tools: Git, GitHub, Jupyter Lab

Core Concepts: Data Structures & Algorithms, DBMS, OOPs, Probability & Statistics

EXPERIENCE

Generative AI Virtual Internship – Google Cloud

2025

- Built AI-powered applications using Gemini and Vertex AI through structured API calls.
- Worked with JSON-based API responses for model interaction and response handling.
- Designed end-to-end AI workflows including data preprocessing, embeddings, and result analysis.
- Documented experiments and participated in discussions on responsible AI and scalable deployment.

PROJECTS

Gen-AI Document QA System - Python, LangChain, ChromaDB, LLM API

[GitHub Repository Link](#)

- Implemented an end-to-end Retrieval-Augmented Generation (RAG) workflow for automated document querying.
- Integrated LLM APIs to generate contextual responses using similarity-based vector retrieval.
- Built Python modules for document chunking, embedding generation, and API-based response handling.
- Structured modular architecture enabling scalable integration and repeatable automation workflows.

Alzheimer Disease Detection using CNN - Python, TensorFlow,

- Performed preprocessing, normalization, and augmentation on 6000+ MRI scans.
- Developed CNN model with 5-fold cross-validation and evaluated using accuracy, precision, and recall.
- Reduced overfitting through hyperparameter tuning and regularization techniques.
- Achieved 92% classification accuracy; research accepted for publication in Springer.

Retail Sales Analytics Pipeline - Python, MySQL

- Designed relational schema and performed data cleaning and transformation using Pandas.
- Developed SQL queries and automated analysis scripts for business insights.
- Built dashboards to track KPIs and enable data-driven decision-making.
- Derived business insights through revenue, cohort analysis.

CERTIFICATIONS

- Google Cloud – Generative AI Virtual Internship
- AWS Academy Graduate – Cloud Foundations
- Languages: English (Fluent), Hindi (Fluent)
