PROFILE SUMMARY

Full-Stack Developer and 2026 Computer Science graduate with hands-on experience building and debugging production SaaS workflows across frontend, backend, APIs, databases, integrations, and AI services. Experienced with REST APIs, authentication, SQL, scheduled automation, API contracts, logs, JSON processing, and system integrations. Strong problem-solving approach with experience tracing issues across services and turning unstructured workflows into reliable automation.

EXPERIENCE

MiClient Private Limited — Full Stack Developer Intern with AI

Apr 2026 – Present

MiClient Full-Stack Platform

- Develop and debug SaaS functionality across React/Next.js, Node.js/Express, Sequelize and MySQL, working with REST APIs, authentication/authorization, database changes, integrations and production issues.
- Designed and implemented an API-first frontend architecture using Next.js App Router, including OpenAPI/Swagger contracts, request/response schemas and endpoint definitions; tested API behavior through Swagger UI.
- Built scheduled backend workflows including IMAP-based email ingestion and database processing; investigated failures by tracing API behavior, logs, database state and service interactions.

MiClient AI & Automation Platform

- Built an end-to-end email inquiry automation pipeline: IMAP ingestion → MySQL processing → keyword/LLM classification and scoring → structured client/product extraction → automatic client creation.
- Implemented activity-to-task automation using Python/FastAPI and Gemini, grouping notes and meeting context by client, generating structured actionable tasks, assigning priority/due dates/users, linking tasks to source activities, and tracking AI processing state.
- Implemented a Qdrant vector retrieval layer over MySQL-backed data including products and clients; generated embeddings, applied company-scoped similarity search, and supplied relevant context to an LLM for structured Quick Deal/Prompt-to-Deal generation.
- Integrated Node.js backend workflows with Python/FastAPI AI services, handling prompt design, structured JSON responses, parsing, persistence and scheduled AI processing; currently working on conversational AI/calling workflows.

PROJECTS

Healthcare Appointment Scheduler

Node.js, Express, MySQL, JavaScript, REST APIs

- Developed REST APIs, authentication and MySQL-backed appointment workflows, strengthening backend, database and API fundamentals.

GenAI Document Question Answering (RAG)

Python, LangChain, ChromaDB, Embeddings

- Built an end-to-end RAG system using document chunking, embeddings, similarity retrieval and LLM-based context-aware responses.

Retail Sales Analytics Pipeline

Python, MySQL, Pandas, SQL, Power BI

- Cleaned and transformed relational data with Pandas and developed 25+ SQL queries using JOINS, CTEs and window functions for business analysis.

Alzheimer's Disease Detection using CNN

Python, TensorFlow, OpenCV

- Processed 6,000+ MRI scans; developed a CNN with augmentation, 5-fold cross-validation and hyperparameter tuning, achieving 92% accuracy; research accepted for Springer publication.

TECHNICAL SKILLS

Programming: JavaScript, Python, Java, C++, SQL

Frontend: React, Next.js, HTML, CSS

Backend & APIs: Node.js, Express.js, FastAPI, REST APIs, OpenAPI/Swagger, JSON

Databases: MySQL, Microsoft SQL Server, Sequelize

AI/ML: Gemini API, LLM Integration, Prompt Engineering, Qdrant, Ollama, LangChain, ChromaDB, TensorFlow, Scikit-learn, Hugging Face

Data & Tools: Pandas, NumPy, Git, GitHub, Docker, GCP/Vertex AI, Swagger UI, Selenium WebDriver, Pytest

Core: DSA, DBMS, OOP, Operating Systems, Debugging, Authentication/Authorization, Data Validation, SDLC/STLC

EDUCATION

Vellore Institute of Technology – B.Tech, Computer Science & Engineering (Health Informatics)

Sep 2022 – 2026

CGPA: 8.26/10.0

Certifications: Google Cloud – Generative AI Virtual Internship (SmartBridge) — AWS Academy – Cloud Foundations

— **Languages:** English (Fluent), Hindi (Fluent)
